Installation or replacement of dust blocks on a patio door

The installation or replacement of the dust blocks on a patio door takes just a few moments and requires Measuring tape only.

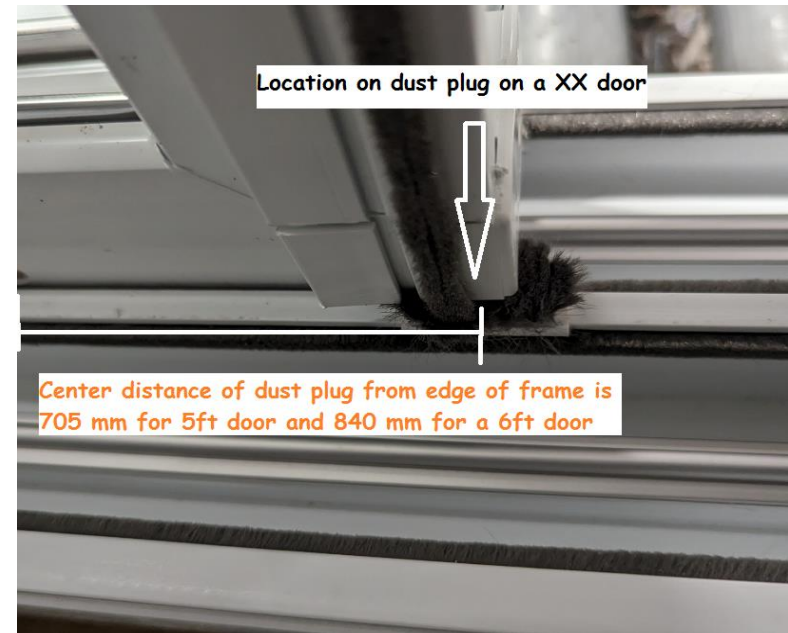

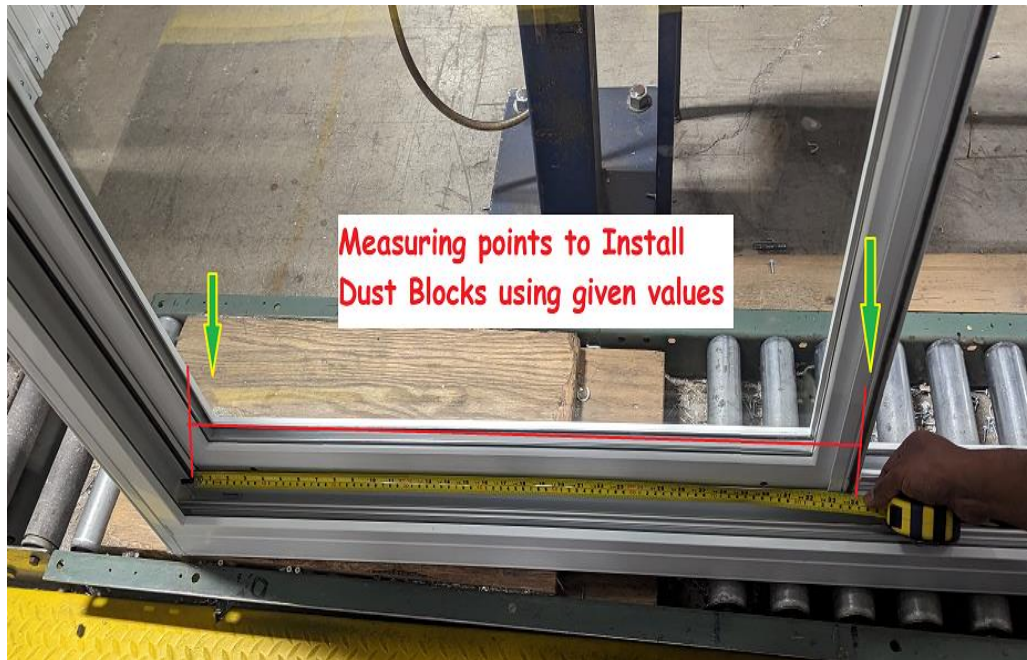

Step 1

- The purpose of installation of dust block/dust plug is very important step to follow after installation of patio door. This is to avoid any air, water or bug infiltration into house.
- There are 2 dust blocks to be installed on every patio door, these should be found in a small pouch that you will receive, that is attached to one of the door handles.

Step 2

- Using measure tape, You can install dust plug/dust block on middle track at 705mm from the edge of bottom frame to center of dust plug for 5ft door and 840mm for a 6ft door.

Step 3

One dust plug goes on the top and second one on the bottom as shown in the pictures.

NOTE: As per the picture below do not install the block too far back, it will still be effective, just more difficult to replace if required.

Top dust block position.

Step 4

- Bottom dust plug Installation position as shown in picture below.
